Professional Summary

Front-End Developer focused on crafting scalable React.js applications with smooth animations and performance-optimized UI. Possess foundational backend knowledge, including building basic REST APIs, configuring Node.js/Express servers, and integrating MongoDB for data storage to support full-stack functionality.

Core Competencies

- Languages : JavaScript (ES6+)
- Front-End: React.js,HTML5, CSS3, Tailwind CSS, Bootstrap, Context API, Redux Toolkit
- Backend : Node.js, Express.js, REST APIs
- Database : Mongodb , Mongoose
- Tools : Git, GitHub, Postman, Vercel

Education

Master of Science in Information Technology (MSc IT) **2025-present**

Sardar Patel University

Projects

Product Management REST API **[Live preview]**

- Built a full-stack product management system using **Node.js, Express, MongoDB (Mongoose), and React**, implementing RESTful CRUD APIs with real-time frontend integration.

Mac theme portfolio [Live preview]

- I built a macOS-style portfolio using React and Tailwind CSS, inspired purely by my obsession with Apple's design language. Clean layouts, subtle animations and a desktop-like experience define the interface.

Invincible Org Clone **[Live preview]**

- Designed and implemented a responsive travel website clone inspired by a contemporary tourism platform, utilizing **HTML5, CSS3, and Bootstrap** to achieve modular architecture.

Drawing Tool **[Live preview]**

- **Built a browser-based writing and drawing application inspired by Figma's core editing features, utilizing HTML5, CSS3, and JavaScript to implement interactive canvas functionality.**
